370             Web development refers to the creating,
371             building, and maintaining
372             of websites. It includes aspects such as
373             web design, web publishing,
374             web programming, and database management.
375             It is the creation of an
376             application that works over the internet
377             i.e. websites.
